File name: dsb-deluxe-full18.exe. File size: 33.51 mb. Date: 17.03.2016 03:26 . dsb deluxe 18 fullQ: Excel VBA - Run Time Error 90 I have a button on my form that calls a subroutine in VBA. The subroutine writes some data to the sheet that the form resides on. If the file is saved, it reads that data from the sheet, writes it to the database, and then deletes the file. The code works fine as long as the user is not logged on to their computer when they run the form. When they log on to their computer, the error "Run Time Error 90" pops up. The code executes before the user is logged on to the computer. How can I get this to work so that it doesn't try to read the data from the sheet if the user is not logged on to the computer? Private Sub openBox_Click() ' Opens the spreadsheet ' Saves the data from the worksheet into a variable Dim Application As Object Set Application = CreateObject("Excel.Application") Application.Visible = True Application.Workbooks.Open Filename:=Me.txtbox_openfile_folder & "" & Me.txtbox_openfile_name 'Read data from the worksheet Me.txtbox_data = Application.ActiveWorkbook 4bc0debe42
