I've been trying to find a related group, and as far as I can tell this is the only presentation that satisfies the criteria, but I could be wrong. A: You might try to compute the Cayley-Hamilton theorem for this group, in order to find the diagonal form of the generators (take the characteristic polynomial) and then use this form of the group to write down a presentation in terms of the generators a and b. For instance, in the case of cyclic groups, the Cayley-Hamilton theorem says that the characteristic polynomial of 6d1f23a050
